

## Busy Time Analysis With Detail (Y/N)

The Busy Time Analysis Report input screen also includes a *Detail (Y/N)* input field. This allows you to print only the TOTALS for the range of dates used to generate the report. This feature is especially useful if you are using the Busy Time Analysis Report to review a large period of time (week, month, year, etc.) and you do not wish to print out all of the day-to-day analysis. Type **N**, for No, in the *Detail (Y/N)* input field in order to receive a summary report containing totals only without the supporting daily analysis.

CompuPawn displays the following input screen:

This input field determines the amount of information to be displayed on the report.

- Type **Y**, for Yes, to print the daily analysis for each date that comprises the date range used to generate the report.
- Type **N**, for No, print only the totals for the date range used to generate the report.

```
