

Counter Price List

Availability: CompuPawn—Inventory Processing & Reports
for those configured with the Product Module

Example: This example shows the first page of the Counter Price List run in its entirety to provide a customer reference of the pricing for product inventory items. Notice that a “Ref Price” column is included on this report which contains retail pricing information for comparison purposes.

Inputs Used: Determine reporting selection criteria (*Product ID, Make, Model, Category, Vendor, etc.*)

• *Show Retail Price Also (Y/N) = {Y, to print a “Ref Price” column on the price list}*
