

## Product Stock Status Report—Reorder Items Only

**Availability:** CompuPawn—Inventory Processing & Reports for those configured with the Product Module

**Example:** This example shows the first page of the Product Stock Status Report run for those items falling below the reorder quantity.

**Inputs Used:** Determine reporting selection criteria (*Product ID, Make, Model, Category, Vendor, etc.*)

• *Items at Reorder Only (Y/N) = {Y, to print report for those items that should be reordered.}*

# Product Stock Status Report—All Items

**Availability:** CompuPawn—Inventory Processing & Reports for those configured with the Product Module

**Example:** This example shows the Product Stock Status Report run in its entirety to list the stock status of all product items ignoring whether or not there is a need to reorder to item.

**Inputs Used:** Determine reporting selection criteria (*Product ID, Make, Model, Category, Vendor, etc.*)

• *Items At Reorder Only (Y/N) = {N, to print all product items}*
