

## Product Price List

**Availability:** CompuPawn systems configured with the Product Module.

**Inputs Used:** Determine reporting selection criteria (*Product ID, Make, Model, Category, Vendor, etc.*)

**Example:** This example shows the first page of the Product Price List run in its entirety to provide a reference listing of the pricing levels associated with product inventory items.

This report is usually run in its entirety to provide a comprehensive listing of all product inventory. Alternatively, it may be run for a specific range of products as selected by the input criteria.
