

Product Detail Report

Availability: CompuPawn systems configured with the Product Module.

Example: This example shows a portion of a Product Detail Report run in its entirety to provide a listing of everything stocked as product inventory.

Inputs Used: Determine reporting selection criteria (*Product ID, Make, Model, Category, Vendor, etc.*)

- This report is usually run in its entirety to provide a comprehensive listing of all product inventory. Alternatively, it may be run for a specific range of products as selected by the input criteria.
